

Collaborative Framework for Care and Control of Tuberculosis and Diabetes

Author: International Union Against Tuberculosis and Lung Disease (The Union) World Health Organization

Publication Date: 2011

Format: Book

Physical Description: 53 p.: col.; annexes, refs., tables.

Language: English

Abstract:

WHO and The Union have developed a Collaborative Framework for Care and Control of Tuberculosis and Diabetes, which presents recommendations based on evidence from systematic reviews and a series of expert consultations. It outlines essential steps for coordinated action in three areas: (1) establishment of mechanisms for collaboration between national TB programmes and suitable counterparts responsible for care and control of diabetes; (2) improved detection and management of TB in patients with diabetes; (3) improved detection and management of diabetes in patients with TB.
